## EDA – Data Import and Export

**Aim:** To import data from various sources, handle different formats, and export a DataFrame to an Excel file using Python.

### Code:

# Step 1: Import libraries

```
import pandas as pd
```

```
import sqlite3
```

```
from bs4 import BeautifulSoup
```

```
import requests
```

```
from io import StringIO
```

# Step 2: Importing data from CSV

```
csv_data = pd.read_csv("sample.csv")
```

```
print("CSV Data:")
```

```
print(csv_data.head())
```

# Step 3: Importing data from Excel

```
excel_data = pd.read_excel("sample.xlsx")
```

```
print("\nExcel Data:")
```

```
print(excel_data.head())
```

Sanjay R

# Step 4: Importing data from SQL Database

# (Creating temporary database and table for demo)

conn = sqlite3.connect(":memory:") # In-memory DB

csv\_data.to\_sql("students", conn, index=False, if\_exists="replace")

sql\_data = pd.read\_sql("SELECT \* FROM students", conn)

print("\nSQL Data:")

print(sql\_data.head())

#web scraping

# URL

url =

"https://en.wikipedia.org/wiki/List\_of\_countries\_by\_population\_(United\_Nations)"

# Add headers to avoid blocking

headers = {"User-Agent": "Mozilla/5.0"}

response = requests.get(url, headers=headers)

# Parse HTML

soup = BeautifulSoup(response.text, "html.parser")

# Find all tables with 'wikitable' class

tables\_html = soup.find\_all("table", {"class": "wikitable"})

print(f"Number of tables found: {len(tables\_html)}")

# Convert the first one into DataFrame

Sanjay R  
231501146

```
if tables_html:
```

```
    tables = pd.read_html(StringIO(str(tables_html[0])))
```

```
    web_data = tables[0]
```

```
    print("Web Scraped Data:")
```

```
    print(web_data.head())
```

```
else:
```

```
    print("No tables found on the page.")
```

```
print("Web Scraped Data:")
```

```
print(web_data.head(2))
```

```
# Step 6: Export DataFrame to Excel
```

```
csv_data.to_excel("exported_data.xlsx", index=False)
```

```
print("\nData exported successfully to 'exported_data.xlsx'")
```

## OUTPUT:

```
CSV Data:
ID      Name  Age  Department  Marks
0 1  Alice   23      CSE         85
1 2   Bob   25      ECE         78
2 3  Charlie 22      ME         90
3 4   David  24     CIVIL        88
4 5    Eva   23       AI         95

Excel Data:
ID      Name  Age  Department  Marks
0 1  Alice   23      CSE         85
1 2   Bob   25      ECE         78
2 3  Charlie 22      ME         90
3 4   David  24     CIVIL        88
4 5    Eva   23       AI         95

SQL Data:
ID      Name  Age  Department  Marks
0 1  Alice   23      CSE         85
1 2   Bob   25      ECE         78
2 3  Charlie 22      ME         90
3 4   David  24     CIVIL        88
4 5    Eva   23       AI         95

Number of tables found: 1
